

Sujet: Expert-e-s genre pour évaluer les projets d'Horizon 2020

Date : Fri, 20 Dec 2013 11:46:27 +0000

De : BECQUET Geraldine <Geraldine.Becquet@cpu.fr> <mailto:Geral...@cpu.fr>

Bonjour,

Le Commission Européenne a besoin d'expert-e-s sur le genre pour évaluer les projets d'Horizon 2020. Pouvez-vous faire circuler l'appel ci-dessous le plus largement possible dans tous vos établissements et réseaux? Il est très important de profiter de cette opportunité pour mettre en avant l'expertise de la recherche française.

We would like to inform you that a call for the establishment of experts to assist Commission services with tasks in connection with Horizon 2020 was launched on 22 November 2013.

When registering experts are invited to detail and document adequately their areas of expertise and professional experience. The novelty is that expertise will also be required on cross-cutting issues of Horizon 2020 such as: gender equality and gender dimension in research. Please note that experts already registered for FP7 need to update their profile for Horizon2020.

The European Commission is not only looking for experts in "Women and gender studies" but for experts in various scientific fields covered by Horizon 2020. Those fields include for example: Gender in computer science, Gender in climatic research, Gender in transport engineering.

How to find the area of expertise:

The interface through which the registration will be done is the "Participants Portal". There you need to go to the "Area of Expertise page" and then click on "Update specialist fields".

For the Horizon 2020 programme, you can choose among keywords covering a broad spectrum of specialist field(s), based on the OECD taxonomy as well as expertise in the area of Business and Innovation.

From there you go down through the tree to find the various specialist fields that corresponds to your profile. A down-arrow symbol beside the field indicates that the field has subfields which you can access by clicking the down-arrow. A black box with a tick mark indicates the lowest level in the tree. Gender has been indicated in more than 50 subfields.

You can find the press release which entails all necessary links here:
